## Republican Forum of Young Scientists was held in Vitebsk

From May 25 to May 27, the Republican Forum of Young Scientists was held at the Vitebsk State University. The forum was held for the first time and brought together young scientists from all over the country. On behalf of BSUIR, the forum was attended by Associate Professor of the Department of Information Security, Chairman of the Council of Young Scientists of BSUIR Olga Boyprav and researcher of computer-aided design of micro- and nanoelectronic systems laboratory Maria Baranova.

The Minister of Education of the Republic of Belarus Andrey Ivanets made a welcoming speech. A plenary session was held. The work of the forum continued in the sections "Science and Innovation" and "Socio-humanitarian foundations of society development". Within the framework of these sections, young scientists presented information about their main achievements in research activities.

The work of the forum "Golden Lectures" from Belarusian scientists who have achieved high performance in research activities has been completed. Trainings and master classes were held throughout the days of the forum.
