BSUIR took part in the exhibition of scientific and technical developments of the winners of youth competitions and in solemn laureates rewarding ceremony of the XXVIII Republican Competition of Scientific Works of Students

The exhibition and solemn laureates awarding ceremony of the XXVIII Republican Competition of Scientific Works of Students took part on June 23 at Minsk State Linguistic University (MSLU). The competition is held annually by the Ministry of Education of the Republic of Belarus in order to support the development of student scientific potential.

At the exhibition BSUIR introduced 3 developments: smart kettle "belTea", smart door lock, and atmospheric discharge plasma generation system. The developments were introduced at different scientific project competitions and emerged victorious in some of them.

A solemn awarding ceremony of laureates of the Republican Competition of Scientific Works of Students was held in the Assembly Hall of MSLU. The First Deputy Minister of Education of the Republic of Belarus Irina Starovoitova delivered a welcoming speech.

Vitaly Choroshko, Head of the Department of Design of Information and Computer Systems was awarded a Diploma of the Ministry of Education.

The following BSUIR students were awarded a Diploma: Oleg Aksenov, Master's Degree graduate, Elizaveta Buschik, graduate of the Faculty of Radio Engineering and Electronics, postgraduate student of the Department of Information Radio Technologies, and Victoria Zhdanovich, graduate of the Faculty of Computer Design, postgraduate student of the Department of Information and Computer Systems Design.
