

Summary

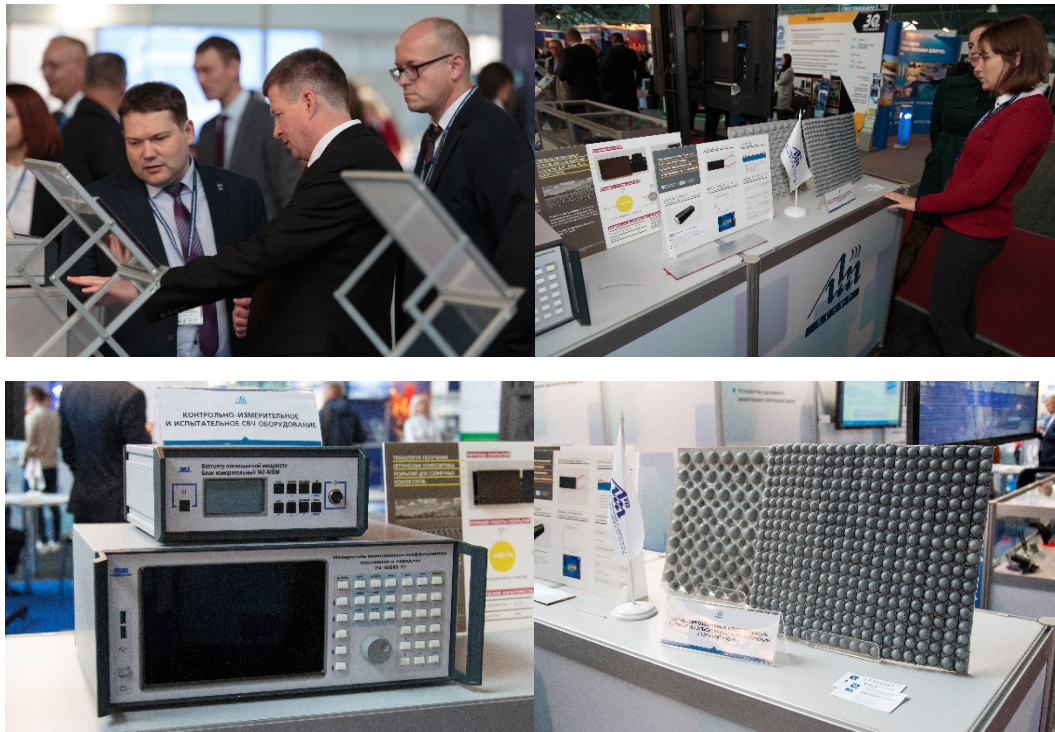

XXV International Exhibition of Industrial Technologies and Innovations "TechInnoProm 2022"

"TechInnoProm 2022" was held on September 20-22 at the Football Arena, Minsk.

At the exhibition, BSUIR introduced innovative developments in the field of microwave measuring equipment, new materials for absorption of microwave electromagnetic radiation and technologies for producing new functional materials that can be used in the energy and automotive industries.

The university developments were recognized by the companies such as Minsk Automobile Plant (MAZ) and "Atlant". It was agreed that a BSUIR delegation will visit the factories in order to get acquainted with the manufacturing processes and discuss the possibility of supplying heating elements and gas absorbers based on the active alumina on a on tape shaped carrier.

By the end of the exhibition, BSUIR was awarded a diploma.
