## Summary

# International Forum on Information and Communication Technologies "TIBO-2023"

BSUIR took part in the International Forum on Information and Communication Technologies "TIBO-2023" on April 18 - 21, 2023 in Minsk, Belarus.

At the exhibition, the university presented innovative technologies in education, intelligent systems for the thematic sector Industry 4.0 and developments in the field of electromagnetic protection and ecology. The visitors got acquainted with the system for monitoring the educational process using IR technologies and innovative educational complexes with the direct participation of students and teachers of the university and Minsk Radio Engineering College.

In the field of electromagnetic protection and ecology the university presented the expert systems of electromagnetic compatibility of complex on-board and ground-based radio system constellations under development, specialized geoinformation technology and software for radio frequency planning GIF-RF, methodology for the analysis of electromagnetic ecology and electromagnetic safety of the population in conditions of mass use of cellular communication EMSE.

Moreover, BSUIR Rector Vadim Bogush moderated the V International Scientific and Practical Conference "Smart Learning: Personnel for Digital Economy" on April 19. Photos from the exhibition can be seen below.
