Summary

Exhibition of the most significant results of scientific, technical, and innovation activities dedicated to the Day of Belarusian Science 2023

BSUIR took part in the Exhibition of the most significant results of scientific, technical, and innovation activities dedicated to the Day of Belarusian Science 2023 on January 26 - 27, 2023 in Minsk, Belarus.

BSUIR representatives introduced the visitors to the developed distance learning system and educational data collection and analysis system based on Moodle LMS, which are used to organize the educational process at the university.

The stand introduced a wireless system for monitoring the temperature and humidity of the environment, as well as other scientific projects of BSUIR.

Photos from the exhibition are below.
