

**Belarusian State University  
of Informatics and Radioelectronics**

R&D Department

**August 27, 2024**

## **Delegation from Guangdong, China, visited BSUIR**

On August 27, specialists from Guangdong University of Technology and Guangzhou Kepu Ultrasonic Electronic Technology Co., Ltd. arrived at the Belarusian State University of Informatics and Radioelectronics.

Associate Professor of the Institute of Mechanical and Electrical Engineering **Zhen Yao** and General Manager of the Guangzhou Kepu Ultrasonic Electronic Technology Co., Ltd. **Guangwei Lei** came to Belarus to negotiate cooperation with our university. The guests were greeted by the Deputy Head of the R&D Department **Ludmila Shichko** and the Head of the R&D Laboratory "Ultrasonic Technologies and Facilities" **Nikolai Dezhkunov**.

Ms. Shichko informed the guests about the scientific and educational achievements of the university, focusing on the recent creation of a technology park, the possibility of advanced training and retraining, as well as on the large-scale cooperation geography.

The colleagues were impressed by the results of successful interaction between BSUIR and more than 100 organizations. The first half of the day hosted technical talks, a tour of the exhibition pavilion, a seminar in the R&D laboratory "Ultrasonic Technologies and Facilities" and a discussion of the results of the current project.

The guests met with the research teams of the R&D Laboratory "Nanoelectronic Materials and Structures", the R&D Laboratory "Nanotechnologies" and the "Plasma Processing Research Center". The delegation got acquainted with the scientific achievements and research equipment of the above laboratories. Moreover, negotiations on the prospects for cooperation were successfully completed.
