BSUIR participation in the 18th International Forum-Exhibition “Accurate measurements – the basis of quality and safety” (MetrolExpo'2024).

BSUIR took part in the 18th International Forum-Exhibition “Accurate measurements – the basis of quality and safety” (MetrolExpo'2024), which was held on September 26–28 at the Gostiny Dvor exhibition complex, Moscow, Russia.

MetrolExpo is a platform for interaction between consumers and manufacturers of measuring, testing, laboratory and metrological equipment, standards and standard samples.

At the exhibition, BSUIR presented the developments of the Research, industrial and training innovation center of microwave technologies and metrology support – MWMLab:

- High-Tech Microwave Devices;
- Scientific and Technical Services in the Field of Calibration and Testing of Millimeter-Wave Equipment;
- Standard Systems of Units of Power and Attenuation of Electromagnetic Oscillations.

The above-mentioned developments have provoked the interest in specialists from a number of Russian and other foreign enterprises and organizations (for example, Lomonosov Moscow State University, Rosatom Technical Academy, Magneton plant), moreover, agreements have been reached on the possibility of expanding the range of microwave equipment for the purpose of further delivery to customers in the Russian Federation, CIS countries and far abroad.
