## Delegation of China Electronics Technology (Group) Co., Ltd. visited BSUIR

The Belarusian State University of Informatics and Radioelectronics continues active cooperation with partners from the People's Republic of China.

On November 11, a delegation including representatives of the management and key officers of China Electronics Technology (Group) Co., Ltd. (CETC), headed by Director Mr. Li Shou Wu, visited to the university.

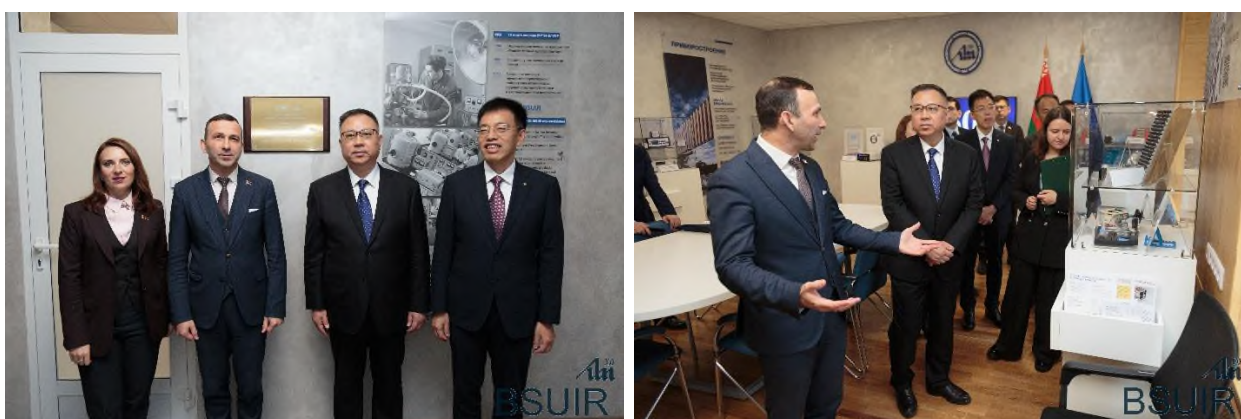

During the meeting, BSUIR Rector Vadim Bogush noted that the university has a 30-year mutually beneficial and fruitful cooperation with CETC. The topics of projects carried out jointly with various CETC institutes are constantly expanding, and a search is underway for new promising areas of cooperation, one of which is the practice-oriented training of highly qualified specialists and highly qualified scientific personnel.

The event included a solemn opening ceremony of the Joint Educational Center for the Training of Highly Qualified Engineering Personnel “BSUIR-CETC”. The opening of the Center, the implementation of bilateral programs for the training of highly qualified engineering and scientific personnel, and the implementation of projects in the field of development and practical implementation of advanced technologies, materials and devices meet the strategic interests of China and Belarus.

The solemn meeting and opening ceremony were attended by representatives of government bodies of the Republic of Belarus – Vice Chairperson of the State Committee on Science and Technology of the Republic of Belarus Tatyana Stolyarova and Head of the Main Department of Professional Education of the Ministry of Education of the Republic of Belarus Sergei Pishchev.

According to Tatyana Stolyarova, the opening of the joint educational center is a vivid confirmation of the strong friendship and active cooperation between China and Belarus. The years 2024-2025 have been declared by the governments of our countries as the Years of Cooperation between the Republic of Belarus and the People's Republic of China in the field of science, technology and innovation. In this regard, support for young scientists is a priority for both countries, because it is the youth and their ideas that are usually the bravest and bring bright results.

Sergei Pishchov noted that the Ministry of Education pays special attention and is ready to provide comprehensive support to the development of cooperation in the scientific and educational spheres between organizations of the Republic of Belarus and the People's Republic of China.

During the meeting, BSUIR Rector Vadim Bogush awarded the Chairman of the Board of CETC Digital Jiang Bo with a gold BSUIR badge for services to the university and emphasized that the opening of the center is only the first step towards the joint training of highly qualified engineering personnel. Today, both countries face new challenges in implementing large-scale projects in the field of science, education and innovation, which is primarily due to the active use and development of human resources, which is the basis for the prosperity and development of any state.
