

Results of BSUIR participation at the 7th China International Import Expo

From November 5 to 10 2024, the 7th China International Import Expo was traditionally held in Shanghai. The Belarusian State University of Informatics and Radioelectronics took part in the collective exposition of the Ministry of Education and presented high-tech developments in the field of space technologies, electromagnetic and information security, as well as this year's novelty – a long-range automobile collision avoidance radar.

The BSUIR stand was visited by high-ranking guests: a delegation of the Embassy of the Republic of Belarus in China headed by the Ambassador; top management of well-known Chinese companies and scientific institutes. During the meetings, the functional capabilities and advantages of the exhibits, the possibility of implementing BSUIR developments in the production processes of interested companies, as well as promising topics for joint scientific research were discussed. Based on the results of participation in the exhibition, BSUIR was awarded a diploma.
