

Announcement of BSUIR participation in the International forum "Digital Expo TIBO-2025"

June 17 – 20, 2025
The Republic of Belarus, Minsk,
14 Pobediteley Ave.,
"BelExpo" National Exhibition Center,
BSUIR Stand E1 at the Education Alley

The "Digital Expo TIBO-2025" International Forum serves as a premier platform for global knowledge exchange, showcasing cutting-edge innovations, and discussing strategies for implementing advanced ICT solutions across economic sectors, social domains, and public administration. The event features an exhibition and a series of conferences.

IT developments and educational programs of the university will be presented at the BSUIR stand within three sections:

- "Digital University".
- "Smart Technologies from the students' point of view".
- "Education for Everyone".

As an example of the digitalization of the university management, the integrated BSUIR management system "Educational Process Management" will be demonstrated.

Interactive youth developments based on neural networks and computer vision technologies for "smart city", "smart home", and "smart production" will also be presented: a safe road-crossing system, a "smart mirror", an intelligent tool-changing system for industrial robots, and much more. You can find out more about the developments presented in the section "Smart Technologies from the students' point of view" in the [CATALOG](#) (in Russian).

BSUIR offers a wide range of educational programs in the field of **information and communication technologies**: programs at the level of secondary specialized education, bachelor's, master's, and postgraduate studies, professional development and retraining courses, training courses and internships.

We invite you to learn more at the **BSUIR stand No. E1**, in the "Education for Everyone" section.
