

Summary of BSUIR participation in the IV Forum of IT-Academgrad "Artificial Intelligence in Belarus"

The *Artificial Intelligence in Belarus Forum* was held on October 13 – 14, 2025 at the National Academy of Sciences of Belarus and brought together representatives of business, science and education sectors to discuss key trends and prospects for the development of artificial intelligence technologies. The forum featured an exhibition of significant domestic developments in the field of artificial intelligence and robotics, as well as a series of roundtables and sections.

As part of the forum's opening ceremony, the winners of the open competition "Leaders of Artificial Intelligence in Belarus – 2025" were awarded. BSUIR was awarded a first-degree diploma in the nomination "Leading Artificial Intelligence Project in Belarus".

This year, more than 60 organisations took part in the exhibition, presenting over 150 projects. Traditionally, BSUIR was appointed responsible for organising the collective stand of universities of the Ministry of Education of the Republic of Belarus.

At the exhibition, BSUIR presented the following developments:

- intellectual assistant for university students;
- training stands for intelligent systems programming;
- a prototype of the industrial robot with interchangeable tool system;
- a safe road-crossing system.
