Results of BSUIR Participation in the 3rd International Security Industry Exhibition “National Security. Belarus 2026”

June 17–19, 2026

Republic of Belarus

Minsk, 24 P. Myadelki Str.

Minsk International Exhibition Center

The event combined congress and exhibition dedicated to discussing innovations, exchanging experience in the field of special-purpose equipment, technologies and weapons, as well as showcasing high-tech developments and ready-made solutions for equipping Belarusian security agencies in the interests of national security.

Within the collective exposition of the State Committee on Science and Technology of the Republic of Belarus, BSUIR presented a wide range of promising developments in the fields of radio electronics, information security and electromagnetic compatibility (EMC). The presented solutions demonstrate the university's strong scientific and technological potential and its ability to create import-substituting products for both the defence and civilian sectors of the economy. B

The BSUIR stand was visited by Vladimir Kukharev, Chairman of the Minsk City Executive Committee, and Denis Korzhitsky, Chairman of the State Committee on Science and Technology.

The developments presented by BSUIR at the exhibition confirm the university's status as a leading centre of expertise in the fields of electronic warfare, radio-frequency spectrum management and technical information protection systems. The proposed solutions have strong potential for implementation at enterprises and within state radio-frequency resource management systems. The exposition attracted considerable interest from industry professionals and potential industrial partners. As a result of participation in the exhibition, BSUIR received a diploma.
