Announcement

BSUIR welcomes to Scientific Youth Day

September 26, 2026

11:00–17:00

**Center for Technical Creativity for Children and Youth
(34 Vaneeva Str., Minsk)**

Every year, the Ministry of Education of the Republic of Belarus holds Scientific Youth Day to promote science and encourage young people to pursue research. The programme includes public lectures, laboratory tours, interactive exhibitions, workshops, science battles and startup presentations, including the “100 Ideas for Belarus” project.

At the exhibition of scientific achievements by young researchers, the Belarusian State University of Informatics and Radioelectronics will present:

- “Pozirk” smart glasses;
- “EcoPulse of Belarus” interactive AI map;
- copper-containing thermal paste with dielectric microparticles;
- anti-Stokes infrared radiation target;
- inverted perovskite solar cell;
- a software tool for automatically calculating eyesocket parameters;
- neural network module for an offset printing quality control system.

Other BSUIR activities will also take place as part of Scientific Youth Day.

Workshops and quizzes:

- “Fundamentals of Healthy Eating” (a social project and winner of the national “100 Ideas for Belarus” competition);
- “Tactile Alphabet” (you will learn how to read using the Braille system);
- an educational workshop of the Academy of Computer Science for Schoolchildren “From Bot to Robot”.

Popular Science Lecture

Topic: How Nuclear Power Plants Work: Explained in Simple Terms.

Speaker: Aliaksei Kliutski (Senior Lecturer at the Department of Electronics, Acting Head of the Student R&D Laboratory).

Date and time: September 26, 2026, at 13:15.

We invite you to attend Scientific Youth Day in Minsk and take part in the exciting activities offered by BSUIR!
